Welcome to DeSales! In order to help you kick-off the new school year we want to make you aware of some of the IT options available for you and some quick tips to get you started.

- Use the MyDSU Portal for access to all of your student information, applications such as Gmail, Blackboard, and Office365

- If you haven’t already we strongly recommend that you enroll in our Password Reset application, this gives you the option to reset your own password at any time without contacting the helpdesk. PLEASE REMEMBER YOU MUST ENROLL FIRST, THEN YOU’LL BE ABLE TO RESET YOUR CURRENT PASSWORD.

- 2-Step Verification is also available which you can administer in your DeSales Gmail account, click here to set up.

- If you’d like to configure your DeSales Gmail for your mobile phone or tablet, please click and review the documentation for your platform respectively.

- Wireless is available in every building across campus, please connect to the DeSales network with the same username and password used to access MyDSU. Be advised, while walking across campus there are no access points outside!

If you’re having any issues please contact our DSU Helpdesk
